Property Description

This beautiful .77 Acre property boasts a spectacular 180 degree panoramic ocean view overlooking the Central Pacific coastline in Costa Rica. Surrounding ocean view homes in the same area just steps away are selling for \$650,000 to \$695,000, and ocean view lots are selling for \$175,000 to \$250,000. What sets this property apart is that it already has water and electricity to the site, along with a small house almost finished. The owner has been living there for over ten years, but after two motorcycle crashes he is fire selling his dream due to financial burdens. With everything almost done, the construction and finishing touches, plus additional wings or even a second floor will be much easier as the main structure is already done with building pad, walls, roof, windows and a kitchen area overlooking the magnificent coastline! Located just 3 miles off the main coastal highway up on a ridge where beautiful oceanview land is now selling at a premium, this property is already mostly done and you can finish it and add on as you like to make your Costa Rica dreams a reality much faster.
